

# WHAT HAPPENS WHEN your company's Information Technology is down or is lost?

- System failure.
- Viruses.
- Hackers.
- Accidental loss of data.
- Hydro brownouts/blackouts.
- Fire.
- Natural Disasters.

***93% of all companies that experience significant data loss are out of business within five years.***

Has your company taken a serious look at Business Continuity and Disaster Recovery Planning?

Do you know the short term and long term effects of an interruption to your business?

Highly successful companies recognize the importance of being proactive in having these plans in place.
