

Conventional Wisdom

"I've got more than adequate security for my AS/400."

With the Internet and PC networks now connected to your AS/400s, employees can directly access your critical data and easily, if accidentally, damage it. PowerLock[®] from PowerTech[®]—the AS/400 experts—puts control of your data back in your hands. It can audit your network traffic, expose your security gaps and then plug them by controlling access the way you specify.

PowerLock is the reality check you need to address your AS/400 network security issues.

Wisdom

Remote Command

If you have PCs connected to your AS/400 system, you've got a major security problem.

And, for a limited time, PowerTech will give you PowerLock intrusion detection software, FREE, so you can discover the truth about your exposure to risk. While this offer runs for a short time, the fully functional software runs forever.

Call PowerTech today at 800.915.7700 or visit our Web site at www.400security.com to get your FREE PowerLock software.

POWERLOCK[®]
network security for AS/400
