# Robot/CLIENT<sup>®</sup> Makes Your iSeries The Perfect Accompaniment

## Keep Your Systems In Harmony

Your iSeries is the most sophisticated and reliable business computer around. But, your business systems include PCs, NT servers, and UNIX workstations and you need a way to orchestrate their communications. Robot/CLIENT, the client operations event manager, does just that with:

- Windows 9x, 2000, and NT
- IBM AIX on the RS/6000
- Sun's Solaris running on the Sun SPARC
- HP UNIX

Make your systems one automation unit with Robot/CLIENT.

## Direct Your Performance with Robot/CLIENT

Robot/CLIENT lets you receive task completion status; check client operational status; monitor Windows or NT applications or services and return a status; start and stop NT or Windows services; send e-mail to clients; FTP files among systems or Internet sites; and upgrade Windows 2000 and Windows applications from a central location. Robot/CLIENT is the perfect accompaniment for your automation needs.

## Lead the Way to a New Arrangement

Robot/CLIENT works with the products of the Robot Automated Operations Solution to make managing your clients even easier. Schedule client tasks with Robot/SCHEDULE<sup>®</sup> and let Robot/SAVE<sup>®</sup> back up your PCs.

## Your Satisfaction Is Guaranteed

Help/Systems backs its products with guarantees unique to the industry. Unhappy with our software? Ask for your money back within one year and we'll refund it without an argument. Unhappy with our product support? Ask for one year of FREE maintenance.

Call **1-800-328-1000** and ask for your FREE Robot/CLIENT Information Kit. Or, visit our Web site at [www.helpsystems.com](http://www.helpsystems.com).
