

Microsoft Exchange Users!

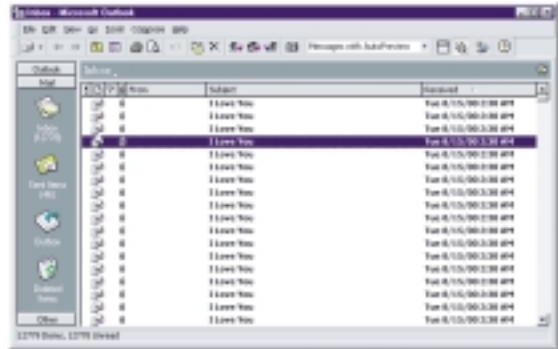

Would You rather spend Saturday ...

A: Recovering from:

Shopping, Fishing, Playing Ball, Hiking,
Skiing, Biking, Going to the Beach,
Travelling, Swimming, Golfing, ...

B: Recovering from:

Melissa, **LoveLetter**, AnnaKournikova,
NakedWife, CodeRed, Sircam, Nimda,
... **and ...**Applying Microsoft Patches

If Your business uses or plans to upgrade its MS Exchange server software, there are critical security, performance and cost (TCO & ROI) issues you should know and consider.

Switch to **inotes** from Lotus Software by IBM for . . .

- Virus Resistant Environment
- Lower IT Resource Requirement
- No "Rip & Replace" Upgrades
- Improved Security
- Lower License Cost
- Minimal Downtime
- Web-based user access
- Greater Scalability
- Works on any Server platform

Because it's not like you don't have something better to do, or enough to worry about already.
