

Life Began Anew on February 20, 2002

Did you feel the change? Where were you on Wednesday February 20, as the clock struck 8:02PM? A rare moment occurred when, for one minute, the date and time formed a perfectly symmetrical number: **2002,2002,2002** – or more precisely, **20:02 20/02/2002**.

According to Windsor area psychic, **Annette Beaulieu**, “Everyone and everything that was unbalanced was forced into change. Life will never be the same”, she predicted. “It will be a complete revelation of time, total enlightenment for everyone.”

This rare uniformity has happened just once before – 1,001 years ago on January 10th, when we had 1001,1001,1001. It will never occur again because the 24-hour clock only goes to 23:59. A number whiz may argue that similar moments have occurred and will still occur, for example at 9:12PM on Dec 21, 2112 (i.e., 2112,2112,2112). But, Beaulieu said, “It’s not the palindromic nature of the number that matters.” She said it’s the repetition of even numbers that multiplies energy fields, creating balance and completion of old and new beginnings.
