Time-Tested Since 1983

Barcode 400

Print labels with embedded RFID microchip

Print Labels Directly
from the AS/400 iSeries and the new i5

Barcode400 was developed specifically for the iSeries, AS/400 and the new i5.

- **Design and print labels in minutes.**
  Create labels using barcodes, boxes, lines, graphics, enlarged text and data directly from your iSeries data base.

- **Easily integrates with existing applications**
  Call from existing RPG, COBOL, CLP programs.

- **All data & software reside on the iSeries**
  Your data and software are centralized & secure.

- **RFID enabled**
  The RFID Add-On makes it easy to print Smart Labels. Barcode400 customers can use many of their existing formats. The "Electronic Product Code™" EPC is encoded into the tag.

- **Compliance labels provided**
  The comprehensive library of label templates available makes set up easy. You will be up and running quickly.

- **Supply Chain Solution**
  Barcode400 has been integrated with JDE, JBA, BPCS, JBA, MAPICS, MOVEX, PRMS, CMS to name a few.

- **All major printer manufacturers supported**
  Visit web site for complete list.
