Mike Warkentin

## Central Ontario iSeries Network

COiN's most recent meeting was held Monday February 5th, at Conestoga College in Kitchener, with guest speakers **Mike Warkentin** (IBM Alliance Manager for DataMirror Corporation), and **Kevin Puloski** (Manager of Remote Managed Services and Technical Services at Able-One Systems Inc.) Mike presented the topic of Business Continuity Planning and Kevin spoke about Remote Manager Service.

Kevin Puloski

The next meeting is scheduled for March 5th. The speaker is **Linda Cole** on the topic of EGL. Enterprise Generation Language (EGL) is IBM Rational's strategic construction technology. EGL extends the programming workbench with a simplified high-level programming language that enables business oriented developers who have little or no experience with Java, Web technologies or Service Oriented Architecture to create enterprise-class applications and services quickly and easily. Code generators automatically transform EGL into Java, COBOL, Web Services and deployment artifacts to support the broadest variety of business application and platform requirements

## Who reads the TUG magazine?

Over 5,000 IT professionals in the GTA, and across the country.
