IBM Expands Power10 Server Family to Help Clients Respond Faster to Rapidly Changing Business Demands

On July 12 IBM announced a significant expansion of its Power10 server line with the introduction of mid-range and scale-out systems to modernize, protect and automate business applications and IT operations.

Join us for a virtual event to learn more about the latest from IBM Power. Hear from IBM experts on why and how you can prepare for the move to Power10, its easier than you think!

Businesses are facing continued uncertainties. Resource availability. Volatility in demand and in costs. Now, more than ever, this requires flexible and reliable technology to deliver.

FOUR REASONS TO ATTEND

- Respond faster to business demands
- Streamline insights and automation
- Protect data from core to cloud
- Maximize availability and reliability

WHY IBM AND R2I:

IBM has a long history of building world-class Infrastructure and Security solutions to keep their client's data and systems safe and available. R2i works with companies to build and optimize infrastructure solutions to maximize performance and resiliency.

WHO SHOULD ATTEND:

IT professionals managing IBM Power systems (IT Directors/Managers, project leads, senior administrators)

Register now and build a better future for your organization

SPEAKERS

Luc Cloutier
Advisory IT Specialist Power | IBM Canada

Luc Cloutier has over 30 years of technical experience with IBM Power® systems and their predecessors. Luc has technical knowledge with IBM i, AIX and Linux operating systems on Power.

Tamara Vandersluis
Vice-President Innovation | R2i

Tamara has over 35 years of IT experience. She works directly with customers delivering services on audit compliance, system performance, capacity planning and problem management (mostly centred around IBM Power systems). She has also had the opportunity to deliver services related to integrating and leveraging upcoming technologies such as Artificial Intelligence.
